Overview

GeoAI: Deep Learning for Geospatial Data is a practical GIS, Geospatial & Remote Sensing program. Apply deep learning to imagery and spatial data: object detection, segmentation and prediction. Every day pairs short theory sessions with hands-on exercises on real data and case studies, so participants leave with methods and templates they can use at work straight away. Join a public session in one of 20 cities or live online, in English or Arabic, or run it in-house with examples from your own projects.

What you will be able to do
