Overview

Spatial Data Infrastructure (SDI) and Geospatial Governance is a practical GIS, Geospatial & Remote Sensing program. Design national and organisational SDIs: policies, standards, metadata, sharing and the UN-IGIF. Every day pairs short theory sessions with hands-on exercises on real data and case studies, so participants leave with methods and templates they can use at work straight away. Join a public session in one of 20 cities or live online, in English or Arabic, or run it in-house with examples from your own projects.

- Apply fundamental datasets and custodianship at work.
